Muntinlupa City

2018 – 2024

WORK EXPERIENCE

FLYRANK AI

AI Intern

Remote, Philippines

Aug 2026– Present

- Developing general AI fluency through hands-on exposure to large language models and modern AI tooling
- Exploring AI-assisted workflows and prompt engineering practices in a professional setting
- Applying foundational knowledge in Python and cloud platforms to support AI-driven processes

PROJECTS

PROOFPAY

2026

- Built a decentralized payment verification system to eliminate fake GCash/bank transfer screenshot scams
- Buyers initiate payments that are logged with a PENDING status on the Stellar blockchain via a Soroban smart contract, which automatically updates to SETTLED upon real fund confirmation
- Implemented dynamic QR codes with 15-minute cryptographic expirations to prevent stale or fraudulent payment attempts
- Enables sellers to verify transactions in real time without relying on easily falsified screenshots

JAIME IN BORDERLAND

2025

- Developed an interactive survival thriller game in Java inspired by Haro Aso's Alice in Borderland
- Designed and built multiple game challenges with a thrilling storyline and visual UI using Java Swing
- Collaborated with a team of 5 developers across game logic, UI design, and narrative flow

ACTIVITIES

GOOGLE DEVELOPER GROUPS ON CAMPUS — MAPÚA UNIVERSITY

Makati City

Chief Operating Officer (COO) Aug 2026 – Present

- Oversee two core divisions under the Operations Department: Events, and Records & Compliance (covering data management, resource management, finance, and audit)

Deputy Director of Events Aug 2025 – Aug 2026

- Led event planning end-to-end: concept, theme, budgeting, cross-departmental coordination
- Managed all paperwork and approvals across departments for major campus tech events

WORKFLOW PH

Remote, Philippines
